PROFILE INFO

A dedicated and highly motivated undergraduate student with a strong interest in cybersecurity and software engineering, eager to apply my technical skills and passion for creativity in a demanding and exciting workplace. Still a beginner with an endless thirst to learn the industry under different conditions.

While I'm still an undergraduate, I'm driven to quickly learn and adapt to any challenge. I'm excited about the opportunity to contribute and grow with your company, making a meaningful impact as a dedicated team member.

EXPERIENCE

INTERN SOFTWARE ENGINEER 2024/12- 2025/06
SCIENTER TECHNOLOGIES PTE

- As an intern software engineer, contributed to real-world development projects, gaining hands-on experience in coding, debugging, and agile collaboration while working with production-level, scalable systems and best practices.
- Tech Stack : Angular, .NET, SQL DBs

PART-TIME SOFTWARE ENGINEER 2025/09- 2025/11
MAVERICK INTELLIGENCE | PROJECT BASED

- Developed an Internal Work Management System (IWMS) during a three-month contract, centralizing core company workflows to improve task management efficiency under the guidance of senior software engineers.
- Tech Stack : Next.js, Flask, NeonDB

PROJECTS

RESOURCE UTILIZATION WITH HPS | KUBERNETES (ONGOING)

- Developing Kubrid, an intelligent Kubernetes autoscaling framework that integrates predictive horizontal and vertical scaling (in-place) for cloud-native microservices.
- Implementing a MAPE-K based controller with time series forecasting and evaluating performance using real world workload simulations and Prometheus metrics.

Docker | Kubernetes | Prometheus | Python
